

**LISTENING TO NOISE AND SILENCE: TOWARDS A
PHILOSOPHY OF SOUND ART**

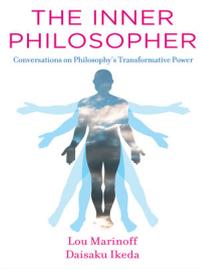

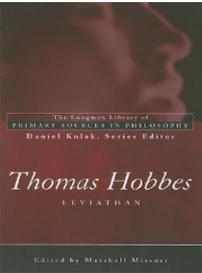

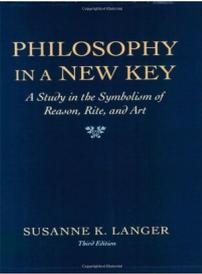

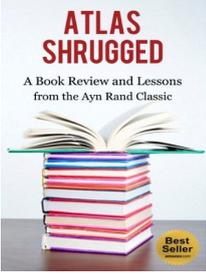

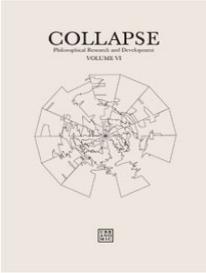

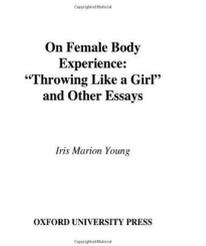

This great ebook about listening to noise and silence: towards a philosophy of sound art by salomé voegelin listening to noise and silence engages with the emerging practice of sound art and the concurrent development of a discourse and theory of sound. in this original and challenging work, salomé voegelin immerses the reader in concepts of listening to sound artwork and the everyday acoustic environment, establishing an aesthetics and philosophy of sound and promoting the noti listening to noise and silence engages with the emerging practice of sound art and the concurrent development of a discourse and theory of sound. in this original and challenging work, salomé voegelin immerses the reader in concepts of listening to sound artwork and the everyday acoustic environment, establishing an aesthetics and philosophy of sound and promoting the notion of a sonic sensibility. a multitude of sound works are discussed, by lesser known

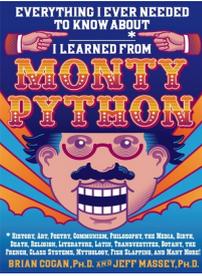

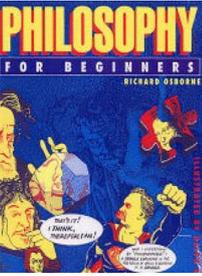

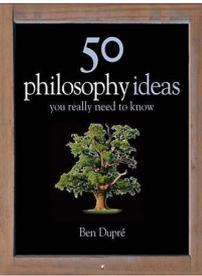

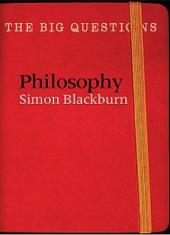

contemporary artists and composers (for example curgenven, gasson and federer), historical figures in the field (artaud, feldman and cage), and that of contemporary canonic artists such as janet cardiff, bill fontana, bernard parmegiani, and merzbow. informed by the ideas of adorno, merleau-pony and others, the book aims to come to a critique of sound art from its soundings rather than in relation to abstracted themes and pre-existing categories. listening to noise and silence broadens the discussion surrounding sound art and opens up the field for others to follow. ...more

	<p>PHILOSOPHY IN A NEW KEY: A STUDY IN THE SYMBOLISM OF REASON, RITE, AND ART: STUDY IN THE SYMBOLISM OF REASON, RITE AND ART (HARVARD PAPERBACKS)</p> <p>modern theories of meaning usually culminate in a critique of science. This book presents a study of human intelligence beginning with a semantic theory and leading into a critique of music. By implication it sets up a theory of all the arts; the transference of its basic concepts to other arts than music is not developed, but it is sketched, mainly in the chapter on art. Modern theories of meaning usually culminate in a critique of science. This book presents a study of human intelligence beginning with a semantic theory and leading into a critique of music. By implication it sets up a theory of all the arts; the transference of its basic concepts to other arts than music is not developed, but it is sketched, mainly in the chapter on artistic import. Thoughtful readers of the original edition discovered these far-reaching ideas quickly enough as the career of the book shows: it is as applicable to literature, art and music as to the field of philosophy itself. The topics it deals with are many: language, sacrament, myth, music, abstraction, fact, knowledge—to name only the main ones. But through them all goes the principal theme, symbolic transformation as the essential activity of human minds. This central idea, emphasizing as it does the notion of symbolism, brings Mrs. Langer's book into line with the prevailing interest in semantics. All profound issues of our age seem to center around the basic concepts of symbolism and meaning. The formative, creative, articulating power of symbols is the tonic chord which thinkers of all schools and many diverse fields are unmistakably striking; the surprising, far-reaching implications of this new fundamental conception constitute what Mrs. Langer has called "philosophy in a new key." Mrs. Langer's book brings the discussion of symbolism into a wider general use than criticism of word meaning. Her volume is vigorous, effective, and well written and will appeal to everyone interested in the contemporary problems of philosophy. ...more</p>	<p>Readable/Downloadable</p>
