	<p>PROVINCIALIZING EUROPE: POSTCOLONIAL THOUGHT AND HISTORICAL DIFFERENCE (NEW EDITION) (PRINCETON STUDIES IN CULTURE/POWER/HISTORY)</p> <p>first published in 2000, dipesh chakrabarty's influential provincializing europe addresses the mythical figure of europe that is often taken to be the original site of modernity in many histories of capitalist transition in non-western countries. this imaginary europe, dipesh chakrabarty argues, is built into the social sciences. the very idea of historicizing carries with it some peculiarly european assumptions about disenchanted space, secular time, and sovereignty. measured against such mythical standards, capitalist transition in the third world has often seemed either incomplete or lacking. provincializing europe proposes that every case of transition to capitalism is a case of translation as well--a translation of existing worlds and their thought--categories into the categories and self-understandings of capitalist modernity. now featuring a new preface in which chakrabarty responds to his critics, this book globalizes european thought by exploring how it may be renewed both for and from the margins. ...more</p>	<p>Readable/Downloadable</p>
	<p>ENCOUNTERING DEVELOPMENT: THE MAKING AND UNMAKING OF THE THIRD WORLD (PRINCETON STUDIES IN CULTURE/POWER/HISTORY)</p> <p>how did the industrialized nations of north america and europe come to be seen as the appropriate models for post-world war ii societies in asia, africa, and latin america? how did the postwar discourse on development actually create the so-called third world? and what will happen when development ideology collapses? to answer these questions, arturo escobar shows how development policies became mechanisms of control that were just as pervasive and effective as their colonial counterparts. the development apparatus generated categories powerful enough to shape the thinking even of its occasional critics while poverty and hunger became widespread. "development" was not even partially "deconstructed" until the 1980s, when new tools for analyzing the representation of social reality were applied to specific "third world" cases. here escobar deploys these new techniques in a provocative analysis of development discourse and practice in general, concluding with a discussion of alternative visions for a postdevelopment era.escobar emphasizes the role of economists in development discourse--his case study of colombia demonstrates that the economization of food resulted in ambitious plans, and more hunger. to depict the production of knowledge and power in other development fields, the author shows how peasants, women, and nature became objects of knowledge and targets of power under the "gaze of experts." ...more</p>	<p>Readable/Downloadable</p>

	<p>POWER/KNOWLEDGE: SELECTED INTERVIEWS AND OTHER WRITINGS, 1972-77</p> <p>Michel Foucault has become famous for a series of books that have permanently altered our understanding of many institutions of western society. He analyzed mental institutions in the remarkable madness and civilization; hospitals in the birth of the clinic; prisons in discipline and punish; and schools and families in the history of sexuality. But the general reader as well as the specialist is apt to miss the consistent purposes that lay behind these difficult individual studies, thus losing sight of the broad social vision and political aims that unified them. Now, in this superb set of essays and interviews, Foucault has provided a much-needed guide to Foucault. These pieces, ranging over the entire spectrum of his concerns, enabled Foucault, in his most intimate and accessible voice, to interpret the conclusions of his research in each area and to demonstrate the contribution of each to the magnificent -- and terrifying -- portrait of society that he was patiently compiling. For, as Foucault shows, what he was always describing was the nature of power in society; not the conventional treatment of power that concentrates on powerful individuals and repressive institutions, but the much more pervasive and insidious mechanisms by which power "reaches into the very grain of individuals, touches their bodies and inserts itself into their actions and attitudes, their discourses, learning processes and everyday lives" Foucault's investigations of prisons, schools, barracks, hospitals, factories, cities, lodgings, families, and other organized forms of social life are each a segment of one of the most astonishing intellectual enterprises of all time -- and, as this book proves, one which possesses profound implications for understanding the social control of our bodies and our minds. ...more</p>	<p>Readable/Downloadable</p>
