

**THE MATH GENE: HOW MATHEMATICAL THINKING EVOLVED  
AND WHY NUMBERS ARE LIKE GOSSIP**

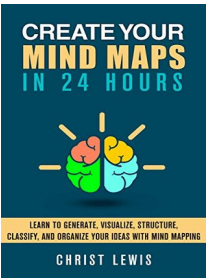

Today ebook tell us about the math gene: how mathematical thinking evolved and why numbers are like gossip by keith j. devlin why is math so hard? and why, despite this difficulty, are some people so good at it? if there's some inborn capacity for mathematical thinking—which there must be, otherwise no one could do it —why can't we all do it well? keith devlin has answers to all these difficult questions, and in giving them shows us how mathematical ability evolved, why it's a part of language ab why is math so hard? and why, despite this difficulty, are some people so good at it? if there's some inborn capacity for mathematical thinking—which there must be, otherwise no one could do it —why can't we all do it well? keith devlin has answers to all these difficult questions, and in giving them shows us how mathematical ability evolved, why it's a part of language ability, and how we can make better use of this innate talent.he also offers a breathtakingly new theory of language development—that language evolved in two stages, and its main purpose was not communication—to show that the ability to think mathematically arose out of the same symbol-manipulating ability that

was so crucial to the emergence of true language. why, then, can't we do math as well as we can speak? the answer, says devlin, is that we can and do—we just don't recognize when we're using mathematical reasoning. ...more

**THINKING WITH TYPE: A PRIMER FOR DESIGNERS, WRITERS, EDITORS, & STUDENTS**

the organization of letters on a blank sheet—or screen—is the most basic challenge facing anyone who practices design. what type of font to use? how big? how should those letters, words, and paragraphs be aligned, spaced, ordered, shaped, and otherwise manipulated? in this groundbreaking new primer, leading design educator and historian ellen lupton provides clear and concise guidance for anyone learning or brushing up on their typographic skills. thinking with type is divided into three sections: letter, text, and grid. each section begins with an easy-to-grasp essay that reviews historical, technological, and theoretical concepts, and is then followed by a set of practical exercises that bring the material covered to life. sections conclude with examples of work by leading practitioners that demonstrate creative possibilities (along with some classic no-no's to avoid). ...more

**HOUSE THINKING: A ROOM-BY-ROOM LOOK AT HOW WE LIVE**

ikea, ethan allen, and hgtv may have plenty to say about making a home look right, but what makes a home feel right? is it the objects you've collected from your travels, or that armchair by the window that reminds you of your grandmother? is it the "friendly" feeling of a classic american farmhouse, or the "prestige" of a formal tudor mansion? these kinds of questions, which have more to do with environmental psychology than mere decorating, can give us a new way to think about the diverse spaces americans call home. in house thinking, noted journalist and cultural critic winifred gallagher takes the reader on a psychological tour of the american home. in each room, gallagher explores many of our deep but often unarticulated intuitions about the power of place. drawing on the latest research in behavioral science, an overview of cultural history, and interviews with leading architects and designers, she shows us how our homes not only reflect who we are, but also influence our thoughts, feelings, and actions. using a variety of examples -- from famous historical homes to experimental rustic pods -- gallagher examines why traditional dining rooms and living rooms have given way to "great rooms," how the oversize suburban garage threatens civility, how kids' rooms can affect their development, and why americans increasingly think of their homes as "sanctuaries" and "refuges." house thinking's unique perspective raises provocative questions: how does your entryway prime you for experiencing your home? do you really need a mega-kitchen, or just a microwave? what makes a bedroom a sensual oasis? how can your bathroom exacerbate your worst fears? it's simply not enough to think of our domestic spaces as design statements or as dumping grounds for our stuff. we need to approach our homes in a new way: as environments that actively affect us and our quality of life. stressing the home's substance over its style, house thinking is a surprising look at how we live -- and how we could. ...more
